

**JST Groups Turnkey Pipe Coating Services** are offered both in-house and on-site, in combination with material supply. External pipe coatings can be applied either by hand wrapping or with a portable handheld tape wrapping tool.

### **Applicator Training:**

Contractors can opt for Guardian Product demonstrations and training conducted by experienced JST Coating Personnel to train new applicators which covers; steel substrate preparation (Hand Tooling, abrasive blasting, material handling, priming of surfaces, hoop tension, overlaps, material quantity calculations, overwraps, testing, etc.).

### **In-House Guardian Pipe Wrapping:**

Conducted by trained JST Coating Personnel, clients can free-issue piping material such as pipes (SRL/DRL), Butt Weld Fittings (Tees, Reducers, Elbows) and Flanges etc. for wrapping of Guardian Products in a controlled environment.

### **In-House & On-Site Guardian Pipe Wrapping:**
