

JST Groups Valve Coating Services are carried out in-house from our JST Sattahip Facilities with past works for major clients in SE Asia. We can accommodate various Paint Systems including Epoxy, Aliphatic Polyurethane, Inorganic Zinc Rich Silicate and Silicone Binders in a wide selection of color charts. JST Coating Services personnel are experienced & qualified applicators. Rigorous testing such as Relative Humidity, Dew Point, Surface Profile, Dust Contamination and Wet Film & Dry Film Thickness is carried out as standard on each batch to ensure a high-quality, traceable paint system is supplied. Supplementary Testing such as Salt Contamination Testing (CSN), Adhesion Testing (Cross-Cut or Pull-Off) and Solvent Rub Tests are also available as required.

Types of Equipment:

- Manual & Actuated Valves (Ball, Gate, Globe, Check, Plug, Butterfly)
- Topworks (Handwheels, Levers, Pneumatic Actuators, Hydraulic Actuators)
- Pumps
- Steam Traps
- Strainers

Size: 1/4" – 36" NB, Pressure Classes ANSI/ASME 150-2500Lbs / API 2K-30K.

BENEFITS OF JST VALVE COATING SERVICES

- A variety of Paints & Thinners stocked at JST in refrigerated unit, ensuring short lead times
- Compliance to End Users Approved Paint Manufacturers List
- Extensive Testing as standard, plus supplementary testing
- Qualified Blasters/Spray Painters
- Custom made jigs, reducing production lead time
- Overhead Cranes and forklifts available for large diameter valves
- Regular checking of Climactic Conditions before and during coating
- Fast Lead times
- Paint Repair on existing systems
